

# Network devices answers

## **Tablets (computer)**

Purpose: to create content and access the network

*Wireless or wired: wireless*

## **Desktop computers (computer)**

Purpose: to create content and access the network

*Wireless or wired: wired (most of the time if this is an office computer - can be wireless)*

## **Printers**

Purpose: to print documents sent by other devices

*Wireless or wired: either (check)*

## **Photocopier**

Purpose: to print documents sent by other devices - can often also scan documents and send via email

*Wireless or wired: either (check)*

**Server** (desktop computer with specific software which defines it as a server)

Purpose: to save documents in a central place that everyone on the network can access

*Wireless or wired: wired*

## **Network switch**

Purpose: a place for all the connections to meet and cross paths, like a network crossroads

*Wireless or wired: wired*

**Wireless access point** (there will probably be several around as wireless signals don't reach far)

Purpose: to connect wireless devices to the network (also usually allows connection to the internet, but today's focus is on the network, not the internet)

*Wireless or wired: wired*
