

Geography

*Kapow
Primary™*

National curriculum
coverage

Development matters across Kapow Primary's units - EYFS: Reception

Development matters statements: Understanding the world Children in reception will be learning to:	Exploring maps	Outdoor adventures - coming soon
Talk about members of their immediate family and community.		
Name and describe people who are familiar to them.		
Explore the natural world around them.	✓Activity 4: Creating journey sticks	
Describe what they see, hear and feel whilst outside.	✓Activity 4: Creating journey sticks	
Compare and contrast characters from stories, including figures from the past.		
Comment on images of familiar situations in the past.		
Understand that some places are special to members of their community.	✓Activity 3: Let's build a map	
Recognise some environments that are different from the one in which they live.	✓Activity 1: Pirate map bingo	
Draw information from a simple map.	✓Activity 1: Pirate map bingo ✓Activity 2: Our school from above ✓Activity 3: Let's build a map ✓Activity 4: Creating journey sticks ✓Activity 5: Investigating maps	
Recognise some similarities and differences between life in this country and life in other countries.		

Early learning goals across Kapow Primary's units - EYFS: Reception

Early learning goals Understanding the World: People, Culture and Communities Children at the expected level of development will:	Exploring maps	Outdoor adventures - coming soon
Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts, and maps;	✓Activity 2: Our school from above ✓Activity 4: Creating journey sticks	
Know some similarities and differences between different religious and cultural communities in this country, drawing on their experiences and what has been read in class;		
Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.		

Early learning goals Understanding the World: The Natural World Children at the expected level of development will:	Exploring maps	Outdoor adventures - coming soon
Explore the natural world around them, making observations and drawing pictures of animals and plants;	✓Activity 4: Creating journey sticks	
Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class;		
Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.		

National curriculum by Kapow Primary's strands and units

Key Stage 1 - National curriculum Geography content Pupils should be taught to:	Kapow Primary's Geography strands	Kapow Primary topics Key stage 1 - Year 1		
		<u>What is it like here?</u>	<u>What is the weather like in the UK?</u>	<u>What is it like to live in Shanghai? -</u>
name and locate the world's seven continents and five oceans	Locational knowledge			✓
name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas	Locational knowledge		✓	
understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country	Place knowledge			✓
identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles	Human and physical		✓	
use basic geographical vocabulary to refer to: key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather	Human and physical	✓		✓
use basic geographical vocabulary to refer to: key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop	Human and physical	✓		✓

National curriculum by Kapow Primary's strands and units

Key Stage 1 - National curriculum Geography content Pupils should be taught to:	Kapow Primary's Geography strands	Kapow Primary topics Key stage 1 - Year 2		
		Would you prefer to live in a hot or cold place?	Why is our world wonderful?	What is it like to live by the coast?
name and locate the world's seven continents and five oceans	Locational knowledge	✓	✓	✓
name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas	Locational knowledge		✓	✓
understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country	Place knowledge	✓		
identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles	Human and physical	✓

Cross-curricular links - Key Stage 1

National curriculum subjects	Kapow Primary topics Key stage 1- Year 1		
	What is it like here?	What is the weather like in the UK?	What is it like to live in Shanghai?
English	Spoken language: Participating actively in collaborative conversations about their local area; working collaboratively to create a messy map; considering the viewpoints of others when discussing feelings about their playground.	Spoken language: Participating actively in collaborative conversations about maps.	Spoken language: Working collaboratively with a partner to locate continents in an atlas.
Maths	Geometry - position and direction: Using directional language to locate features on a map of the playground.	Geometry - position and direction: Using compass directions to describe the location of features.	Geometry - position and direction: Using directional language to locate features in the local area; using compass directions to describe the location of features.
Science		Seasonal changes: Observing changes in the school grounds across the four seasons; keeping a weather diary and describing weather associated with the seasons.	
Art and design	Drawing to develop and share their ideas, experiences and imagination.	Sketching their observations of the weather in the school grounds; making a wind streamer.	Drawing a freehand sketch map; designing a postcard; sketching their view from a window.
RSE/PSHE	Thinking about things they can do to help look after their playground.		

Cross-curricular links - Key Stage 1

National curriculum subjects	Kapow Primary topics Key stage 1- Year 2		
	Would you prefer to live in a hot or cold place?	Why is our world wonderful?	What is it like to live by the coast?
English	Spoken language: Participating actively in collaborative conversations about maps and atlases; listening and responding appropriately when sharing what they have learnt about hot and cold places; explaining whether they would prefer to live in a hot or cold place and expressing their feelings.	Spoken language: Sorting human and physical features collaboratively; listening and responding appropriately to adults and their peers to share what they have learnt about oceans.	Spoken language: Participating in a collaborative conversation about the location of the seas and oceans surrounding the UK; presenting an advert for Weymouth.
Maths	Geometry - position and direction: Using directional language; recognising North, East, South and West on a map.		Statistics: Interpreting and constructing simple pictograms and tally charts; asking and answering simple questions by counting the number of objects in each category and sorting the categories by quantity.
Science		Living things and their habitats: Identifying that most living things live in habitats to which they are suited; describing how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.	
Art and design		Drawing a sketch map using symbols for human and physical features.	

Cross-curricular links - Lower key Stage 2

National curriculum subjects	Kapow Primary topics Year 3		
	Why do people live near volcanoes?	Who lives in Antarctica?	Are all settlements the same?
English	<p>Spoken language: Listening and responding appropriately to adults and their peers whilst analysing rocks; asking relevant questions about rocks and where they have come from; articulating and justifying arguments on whether they would live near a volcano; describing the properties of the layers of the Earth; verbally exploring ideas for their own earthquake-proof building.</p> <p>Reading: Retrieving and recording information from non-fiction texts on volcano classification.</p>	<p>Spoken language: Articulating and justifying their ideas around the similarities and differences between the UK and Antarctica; listening and responding appropriately to their peers when following instructions to map a route in the school grounds.</p>	<p>Spoken language: Listening and responding appropriately to adults and their peers whilst conducting fieldwork; participating in collaborative conversations around what maps and photographs can tell us about the local area; articulating the similarities and differences between their locality and New Delhi.</p>
Maths		<p>Measurement: Converting between centimetres and kilometres to find the length of Antarctica using a ruler and calculator (greater depth only).</p> <p>Geometry - position and direction: Using coordinates on a 2D grid to find a position on a world map and plotting a point.</p>	
Science	<p>States of matter: Understanding that the Earth's crust changes state when heated to extreme temperatures.</p> <p>Rocks: Exploring how rocks change over time to form mountains and volcanoes and where rocks originally come from; learning that rocks break down into fertile soils in a volcanic environment; grouping and comparing rocks based on their appearance and properties; observing crystals and grains in a rock during their fieldwork.</p> <p>Living things and their habitats: Recognising how volcanoes can change a landscape and realising the impact this may have on living things.</p> <p>Forces: Noticing that earthquakes occur because of forces at tectonic plate boundaries.</p>	<p>States of matter: Understanding that the sea around Antarctica can freeze and melt depending on the season and temperature.</p>	
Art	Practising their control of materials by crafting a model of the Earth.		
Computing	Using search technologies effectively when researching volcano classification.	Using a digital device to record and present information on the experience of a researcher in Antarctica (optional); Understanding how the internet can provide useful services such as Google Earth to explore their locality.	Using technology to locate and look at the features of UK coasts.
History		Studying a famous Antarctic explorer from British history.	Identifying how land use has changed over time in the local area using old maps.
PE	Taking part in outdoor adventurous activity as part of a team during geology fieldwork on the school grounds.	Planning and taking part in an outdoor adventurous activity around the school grounds.	Planning and taking part in an outdoor adventurous activity around the local area.

Cross-curricular links - Lower key Stage 2

National curriculum subjects	Kapow Primary topics Year 4		
	Why are rainforests important to us?	Where does our food come from?	What are rivers and how are they used?
English	<p>Spoken language: Using manners when carrying out questionnaires during woodland fieldwork; participating in collaborative conversations about what maps and photographs can tell us about the Amazon rainforest; justifying their arguments for saving the Amazon rainforest; asking relevant questions to understand how plants have adapted to living in a tropical rainforest; giving well-structured descriptions and explanations on how indigenous tribes use the Amazon rainforest to survive; presenting their findings from their woodland fieldwork.</p> <p>Writing: Planning and writing a fact file on the indigenous peoples and a letter about saving the rainforest by discussing and recording ideas and organising them into paragraphs; writing a letter to the Brazilian government.</p>	<p>Spoken language: Articulating and justifying ways in which a particular food choice can negatively impact the environment and what can be done to make a positive difference; asking questions during an interview to extend their understanding of where school dinners come from; gaining and maintaining interests of the listeners when presenting reports on where it is best to shop and why.</p> <p>Reading: Reading non-fiction texts and summarising key ideas to present to the class about how different foods impact the environment.</p> <p>Writing: Writing a balanced argument on where best to buy food by discussing and recording ideas and organising them into paragraphs.</p>	<p>Spoken language: Participating in collaborative conversations about what maps and photographs can tell us about the local river; listening and responding appropriately to adults and their peers whilst conducting fieldwork; presenting their findings from their rivers fieldwork.</p>
Maths	<p>Statistics: Completing, interpreting and presenting data on how people use the local woodland using tally charts and bar charts.</p>	<p>Measurement: Converting centimetres to kilometres using a scale bar on a map and a calculator.</p> <p>Statistics: Interpreting data from a tally chart showing where household food comes from.</p>	
Science	<p>Plants: Identifying and describing the functions of different parts rainforest plants; exploring how plants have adapted to survive in the Amazon rainforest.</p> <p>Animals including humans: Interpreting and identifying where producers, predators and prey live in the rainforest and why.</p> <p>Living things and their habitats: Exploring the human impact on the Amazon rainforest with particular focus on deforestation, recognising that the Amazon rainforest is changing and the effects of this.</p>	<p>Living things and their habitats: Recognising how climate change may impact food sources.</p> <p>Properties and changes of materials: Recognising that chocolate comes from a cocoa bean and goes through a process where it changes state to become chocolate.</p>	<p>States of matter: Identifying the part played by evaporation and condensation in the water cycle.</p>
Computing		Using a digital device to create content to present to an audience that informs them of the relationship between food and the environment.	
D & T		Describing how seasons can impact food grown.	Make: Practising shaping, cutting and joining skills to create a model of a river.
History	Devise historically valid questions on changes, causes and significance to the indigenous peoples when logging and mining groups entered the Amazon rainforest.		
PE	Taking part in outdoor activities as part of a team during fieldwork to their local woodland.		Taking part in outdoor activities as part of a team during fieldwork to their local river.
PSHE	Discussing things they can do to help look after their environment.	Discussing things they can do to help look after their environment.	

Cross-curricular links - Upper key Stage 2

National curriculum subjects	Kapow Primary topics Year 5		
	What is life like in the Alps?	Why do oceans matter?	Would you like to live in the desert?
English	<p>Spoken language: Maintaining attention and participating actively in collaborative conversations about the human and physical characteristics of the Alps; listening and responding appropriately to adults and their peers when completing fieldwork in the local area; presenting their findings when comparing the local area with an Alpine area.</p> <p>Writing - composition: Writing a tourist brochure which includes information about the human and physical features of the Alps.</p>	<p>Spoken language: Using sentence stems and word banks to help verbalise ideas around threats to oceans and coral reefs.</p> <p>Writing - composition: Planning and writing an information text about ocean environments.</p>	<p>Reading: Retrieving and recording information from non-fiction texts on environmental threats facing deserts.</p> <p>Writing - composition: Writing a letter to a family which includes both benefits and drawbacks about living in a desert environment.</p>
Maths		<p>Statistics: Creating a pie chart to reflect data found during fieldwork.</p>	<p>Number – number and place value: Comparing numbers on a line graph showing temperature.</p> <p>Statistics: Solving comparison problems using a line graph showing temperature. Beginning to associate line graph data with changes over time in the context of annual temperature.</p>
Science	<p>Rocks: Exploring how rocks change over time to form mountains.</p>		<p>Evolution and inheritance: Considering the types of animals and plants that have adapted to living in a hot desert biome.</p> <p>States of matter: Associating the rate of evaporation with hot desert temperatures and the creation of salt flats.</p> <p>Earth and space: Comparing the time of day at different places on the Earth through internet links and direct communication.</p> <p>Living things and their habitats: Exploring how human activity has impacted upon desert environments.</p>
Computing		<p>Using search technologies and digital content to research the Great Barrier Reef.</p>	<p>Using search technologies and digital content to research physical desert features.</p>
PE	<p>Taking part in outdoor activities as part of a team during fieldwork in their local urban environment.</p>	<p>Taking part in team outdoor activities during fieldwork in their local marine environment.</p>	
RSE/PSHE	<p>Discussing things they can do to help look after their environment.</p>	<p>Discussing things they can do to help look after their environment.</p>	

Cross-curricular links - Upper key Stage 2

National curriculum subjects	Kapow Primary topics Year 6		
	Why does population change?	Where does our energy come from?	Can I carry out an independent fieldwork enquiry?
English	<p>Spoken language: Giving descriptions and expressing opinions on how hospitable an environment is; playing a vocabulary game to show an understanding of new words; contributing their viewpoint on why people may choose to migrate; presenting a poster to explain the impact of climate change on the population; using the correct command of Standard English and responding appropriately when speaking to the general public during fieldwork; reading a report to present and analyse their fieldwork data.</p> <p>Writing: Identifying an audience, developing an initial idea and drawing on their research to create a typed report of their fieldwork findings.</p>	<p>Spoken language: Participating in collaborative conversations considering what maps and photographs can tell us about Midland, Texas and Port of Blyth; giving well-structured descriptions and explanations on the different ways energy can be generated; listening and responding appropriately to adults and their peers whilst conducting fieldwork on the school grounds.</p> <p>Reading: Retrieving and recording information from non-fiction texts on the different ways to generate energy.</p>	<p>Spoken language: Listening and responding appropriately to adults and their peers whilst conducting fieldwork; using manners when carrying out questionnaires during fieldwork; presenting their fieldwork data to an audience.</p> <p>Writing: Identifying an audience to collect data and designing and creating data collection methods; planning and writing a fact file on the process of the fieldwork enquiry and its outcome.</p>
Maths	<p>Statistics: Interpreting a population pie chart and drawing a line graph to show population growth; interpreting population data from a table to calculate natural increase.</p> <p>Number: Using population data to calculate natural increase.</p>		
Science		<p>Earth and space: Comparing the time of day at different places on the Earth through internet links and direct communication.</p>	
Computing	<p>Understanding that the internet can be a tool for communicating and presenting data through digital map making; using a digital device to create content that explains what climate change is, why it is happening, its impact and how we can fight it.</p>		<p>Using digital mapping software to follow their fieldwork route digitally; selecting and using software to design data collection templates and to create a presentation to show the outcome of the fieldwork enquiry.</p>
History	<p>Noting population trends over time and addressing questions on the cause of these.</p>		
PE	<p>Taking part in outdoor activities as part of a team during fieldwork in their local urban area.</p>	<p>Taking part in outdoor activities as part of a team during fieldwork in their school grounds.</p>	<p>Taking part in outdoor activities as part of a team during fieldwork in their locality.</p>
RSE/PSHE		<p>Discussing things they can do to help look after their environment.</p>	

Version history

Date	Update
07.09.23	Updated to include Development matters and Early Learning Goals links for EYFS: Reception activities now published on the website (p. 2-3).
